

This gel depicts the NEB 1kb ladder and a digestion of the plasmid LeGO-iT2 with the following enzymes: EcoRI HF and BamHI HF

Plasmid 27343
LeGO-iT2

DNA digested with EcoRI HF, BamHI HF single digests for **2 hours**
Gel: 0.8% TAE stained with 100 ml 1X TAE and 3uL of ethidium bromide
Ran for 2 hours at 47 volts
