

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pUHD Cdk1 WT HA with the following enzymes: BamHI-HF, Xho I and HpaI.

**Plasmid 27652:**  
pUHD Cdk1 WT HA

DNA digested with BamHI-HF single digest and Xho I and HpaI double digests for **2 hours**.

Gel: 0.8% agarose stained with 5 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
