

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pTight-hMYT1L-N174 with the following enzyme: PvuI-HF.

Plasmid 31877:
pTight-hMYT1L-N174

DNA digested with PvuI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
