

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pAAV-Gateway with the following enzymes: AseI and Sma I.

**Plasmid 32671:
pAAV-Gateway**

DNA digested with AseI and Sma I single digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
