

This gel depicts the NEB 1kb ladder and a digestion of the plasmid 35202 with the following enzymes: NcoI-HF single digest, KpnI-HF single digest

Plasmid 35202
pBID-UASC-G

DNA digested with NcoI-HF single digest, KpnI-HF single digest for **2 hours**

Gel: 0.8% TAE stained with 100 ml 1X TAE and 5uL of ethidium bromide
Ran for 2.5 hours at **47** volts
