

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pPROBE-OT with the following enzymes: PvuI-HF and HindIII-HF.

DNA digested with a PvuI-HF single digest and a PvuI-HF/HindIII-HF double digest for **2 hours**.  
Gel: 0.8% agarose stained with 5  $\mu$ L of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
