

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pLenti-puro-ARID1A with the following enzymes: HpaI and EcoRI-HF.

Plasmid 39478:
pLenti-puro-ARID1A

DNA digested with HpaI and EcoRI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1 hours at 100 volts.
