

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid pLMB51 with the following enzymes: PstI-HF, NotI-HF, and KpnI-HF.

**Plasmid 40083:
pLMB51**

DNA digested with PstI-HF, NotI-HF, and KpnI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
