

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pCE-mp53DD with the following enzymes: Sall-HF and EcoRI-HF.

**Plasmid 41856:**  
pCE-mp53DD

DNA digested with Sall-HF and EcoRI-HF single digests for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
