

This gel depicts the NEB 1kb ladder and a digestion of the plasmid shBCL2L1 # 1 with the following enzymes: EcoRI-HF and NcoI-HF.

**Plasmid 42551:**  
shBCL2L1 # 1

DNA digested with EcoRI-HF and NcoI-HF double digest for **2 hours**.  
Gel: 0.8% agarose stained with 5  $\mu$ L of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
