

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pCRISPR with the following enzymes: XhoI and MluI-HF.

Plasmid 42875: pCRISPR

DNA digested with Xho I and MluI-HF double digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
