

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pINDUCER11 (miR-RUG) with the following enzymes: SspI-HF and BamHI-HF

Plasmid 44363:
pINDUCER11 (miR-RUG)

DNA digested with SspI-HF and BamHI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
