

This gel depicts the NEB 1kb ladder and a digestion of the plasmid NL4-3 mCherry Luciferase with the following enzyme: BamHI-HF, ApaI, and EcoRI-HF.

Plasmid 44965:
NL4-3 mCherry Luciferase

DNA digested with BamHI-HF single digest and ApaI, EcoRI-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
