

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid pT3TS-nCas9n with the following enzymes: Agel-HF and HindIII-HF.

**Plasmid 46757:**  
pT3TS-nCas9n

DNA digested with Agel-HF and HindIII-HF single digests and Agel-HF/ HindIII-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
