

This gel depicts the NEB 1kb plus ladder and a digestion of the plasmid pSmart-Nm-sgRNA-BbsI with the following enzymes: HindIII-HF and EcoRI-HF.

Plasmid 49157:
pSmart-Nm-sgRNA-BbsI

DNA digested with HindIII-HF and EcoRI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 μ L of ethidium bromide.
Ran for 1.5 hours at 100 volts.
