

This gel depicts the NEB 1kb Ladder and a digestion of the plasmid pCH51266 with the following enzymes: Ase I and Xho I

Plasmid 50267 pCH51266

DNA digested with Ase I and Xho I double digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
