

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pFGC-pcoCas9 with the following enzymes: EcoRI-HF, NheI-HF, and BamHI-HF.

**Plasmid 52256:**  
pFGC-pcoCas9

DNA digested with BamHI-HF single digest and EcoRI-HF/ NheI-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
