

This gel depicts the NEB 1kb ladder and a digestion of the plasmid AAVS1-TRE3G-EGFP with the following enzymes: NheI-HF and SpeI-HF.

Plasmid 52343:
AAVS1-TRE3G-EGFP

DNA digested with NheI-HF single digest and NheI-HF/SpeI-HF double digest for **2 hours**.
Gel: 0.8% agarose stained with 5 μ L of ethidium bromide.
Ran for 1.5 hours at 100 volts.
