

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pcDNA3.1/Puro-CAG-ASAP1 with the following enzymes: KpnI-HF and NcoI-HF.

Plasmid 52519:
pcDNA3.1/Puro-CAG-ASAP1

DNA digested with KpnI-HF and NcoI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 2 hours at 80 volts.
