This gel depicts the NEB 1kb ladder and a digestion of the plasmid pMH5 with the following enzymes: NotI-HF and Xhol.

**Plasmid 52531:**

pMH5

DNA digested with NotI-HF single digest and Xhol/NotI-HF double digest for 2 hours.

Gel: 0.8% agarose stained with 5 uL of ethidium bromide.

Ran for 2 hours at 80 volts.
