

This gel depicts the NEB 1kb ladder and a digestion of the plasmid 53133 with the following enzymes: SapI single digest, Sall single digest, SapI + Sall- HF double digest

Plasmid 53133
pGfa2(ABDx3)-nLac

DNA digested with SapI single digest, Sall single digest, SapI + Sall- HF double digest for **1.5 hours**

Gel: 0.8% TAE stained with 100 ml 1X TAE and 5uL of ethidium bromide
Ran for 2 hours at **47** volts
