

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pAAV/D377Y-mPCSK9 with the following enzyme: SbfI-HF.

Plasmid 58376:
pAAV/D377Y-mPCSK9

DNA digested with an SbfI-HF single digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
