

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pRL623 with the following enzymes: EcoRI HF and PstI

**Plasmid 58494**  
pRL623

(Longer exposure)

DNA digested with EcoRI HF and PstI, single digests for **2 hours**  
Gel: 0.8% TAE stained with 100 ml 1X TAE and 5uL of ethidium bromide  
Ran for 1.5 hours at 72 volts
