

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pMaster12 with the following enzymes: EcoRI-HF.

**Plasmid 58527:  
pMaster12**

DNA digested with EcoRI-HF single digest for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
