

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pX330A-1x2 with the following enzymes: BglII and EcoRI-HF.

Plasmid 58766:
pX330A-1x2

DNA digested with BglII and EcoRI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
