

This gel depicts the NEB 1kb ladder and a digestion of the plasmid p201N Cas9 with the following enzymes: EcoRI HF and NcoI HF

**Plasmid 59175:**  
p201N Cas9

DNA digested with EcoRI HF, NcoI HF single digests for **2 hours**

Gel: .8% TAE stained with 150 ml 1X TAE and 3uL of ethidium bromide

Ran for 1 hour at 100 volts
