

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pcDNA3.1(+) CircRNA Mini Vector with the following enzymes: PvuI-HF and XhoI.

DNA digested with PvuI-HF single digest and PvuI-HF/ XhoI double digest for **2 hours**.  
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
