

This gel depicts the NEB Lambda DNA-HindIII ladder and a digestion of the plasmid pHSE401 with the following enzymes: Agel, EcoRI HF.

### Plasmid 62201 pHSE401

DNA digested with Agel and EcoRI HF single digests for **2 hours**  
Gel: 0.8% TAE with 3uL of ethidium bromide in gel  
Ran for 3 hours at 47 volts
