

This gel depicts the NEB 1kb ladder and a digestion of the plasmid VAMP7 HA-delta pMEP4 with the following enzymes: BamHI-HF and KpnI-HF.

Plasmid 62958:
VAMP7 HA-delta pMEP4

DNA digested with BamHI-HF/ KpnI-HF double digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
