

This gel depicts the NEB 1kb ladder and a digestion of the plasmid 63087 with the following enzymes: BamHI and BamHI+NheI

Plasmid 63087
pAAV CTG 700x

DNA digested with BamHI-HF single digest and BamHI-HF+ NheI-HF double digest for **2 hours**

Gel: 0.8% TAE pre-stained with 3 uL of ethidium bromide

Ran for 4 hours at **47** volts
