

This gel depicts the NEB 100 bp ladder and a digestion of the plasmid 5'UTR CGG 99x FMR1-EGFP with the following enzymes: HindIII-HF and XhoI.

Plasmid 63091:
5'UTR CGG 99x FMR1-EGFP

DNA digested with HindIII-HF/ XhoI double digest for **2 hours**.
Gel: 2% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
