

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pDEST26-USP47 with the following enzymes: NheI-HF and KpnI-HF.

Plasmid 64326:
pDEST26-USP47

DNA digested with NheI-HF/ KpnI-HF double digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
