

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pcDNA3-OVA with the following enzymes:
BamHI-HF and SmaI

Plasmid 64599:
pcDNA3-OVA

DNA digested with BamHI-HF/SmaI double digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
