

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pLPCX mito Grx1-roGFP2 with the following enzymes: AfIII and EcoRI-HF.

Plasmid 64977:
pLPCX mito Grx1-roGFP2

DNA digested with AfIII and EcoRI-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
