

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pQCXIP-GFP1-10 with the following enzymes: PvuI-HF and Bgl II.

Plasmid 68715:
pQCXIP-GFP1-10

DNA digested with PvuI-HF and Bgl II single digests and PvuI-HF/Bgl II double digest for **2 hours**.

Gel: 0.8% agarose stained with 5 μ L of ethidium bromide.

Ran for 1.5 hours at 100 volts.
