

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pTRK669 with the following enzyme(s): NheI-HF and Accl.

Plasmid 71313:
pTRK669

DNA digested with NheI-HF and Accl single digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of SYBR Safe.
Ran for 1.5 hours at 100 volts.
