

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pDEST-ORF-V1 with the following enzymes: BgIII, KpnI-HF, and SmaI.

Plasmid 73637:
pDEST-ORF-V1

DNA digested with BgIII single digest and KpnI-HF/ SmaI double digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
