

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pCIP-Flag-TfebAA with the following enzymes: XhoI and HindIII-HF.

Plasmid 79014: pCIP-Flag-TfebAA

DNA digested with XhoI and HindIII-HF single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
