

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pDuRCC-K with the following enzymes: NdeI and XhoI.

**Plasmid 81193:**  
pDuRCC-K

DNA digested with NdeI single digest and NdeI/XhoI double digest for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
