

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid Tet-CA-Src-GFP with the following enzymes: Clal and Xbal.

Plasmid 83469: Tet-CA-Src-GFP

DNA digested Clal and Xbal double digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
