

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pLenti Lifeact-mRuby2 PuroR with the following enzymes: MluI-HF.

**Plasmid 84386:**  
pLenti Lifeact-mRuby2 PuroR

DNA digested with MluI-HF single digest for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
