

This gel depicts the NEB 1kb ladder and a digestion of the plasmid EZ-Tet-pLKO-Puro with the following enzymes: NheI-HF and EcoRI-HF.

Plasmid 85966:
EZ-Tet-pLKO-Puro

DNA digested with NheI-HF single digest and EcoRI-HF/ NheI-HF double digest for **2 hours**.

Gel: 0.8% agarose stained with 6 uL of ethidium bromide.

Ran for 1.5 hours at 100 volts.
