

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pYPQ230 (LbCpf1) with the following enzymes: Apal.

Plasmid 86210:
pYPQ230 (LbCpf1)

DNA digested with Apal single digest for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
