

This gel depicts the NEB 1kb ladder and a digestion of the plasmid CROPseq-Guide-Puro with the following enzymes: BsmBI and SphI.

Plasmid 86708:
CROPseq-Guide-Puro

DNA digested with BsmBI and SphI single digests for **2 hours**.
Gel: 0.8% agarose stained with 5 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
