

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pBN79 with the following enzymes: NheI-HF and BglII.

Plasmid 86717:
pBN79

DNA digested with NheI-HF and BglII single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
