

This gel depicts the NEB 1kb ladder and a digestion of the plasmid pSFV-Helper1 with the following enzymes: BglIII and StuI.

Plasmid 92073: pSFV-Helper1

DNA digested with BglIII single digest and BglIII/ StuI double digest for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
