

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid pCEP4-myc-CXCR4 with the following enzymes: EcoRV-HF and Clal.

Plasmid 98946:
pCEP4-myc-CXCR4

DNA digested with EcoRV-HF and Clal single digests for **2 hours**.
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.
Ran for 1.5 hours at 100 volts.
