

This gel depicts the NEB 1kb extended ladder and a digestion of the plasmid pCDH-CMV-PDGFRa-3xFlag-EF1-nlsCopGFP with the following enzymes: NheI-HF and NdeI.

DNA digested with NheI-HF single digest and NheI-HF/ NdeI double digest for **2 hours**.  
Gel: 0.8% agarose stained with 6 uL of ethidium bromide.  
Ran for 1.5 hours at 100 volts.
